

ATHLETICO

PHYSICAL THERAPY

Better for every body.

Dear Student,

We are pleased you will be completing one of your clinical rotations at Athletico. This will be an educational and rewarding experience for both you and your clinical instructor, CI. Once your clinical rotation is confirmed, then you will receive a Student Packet from your CCCE with much more detailed information. Here is some information to get you started.

What to complete prior to your first day?

- 1) Email proof of CPR card to your CI
- 2) Please contact your CI prior to your first day to learn your specific schedule
- 3) Complete on-line registration with Athletico. You will receive the link to register from your CCCE.
- 4) Ensure your DCE emailed Background Check Form to clinicaleducation@athletico.com

*Additional paperwork including HIPPA, emergency procedures, and orientation checklist will be completed your first week.

What to expect on your 1st day?

You will meet with your CI, one on one, for orientation and to become acquainted with your site and staff members. Depending on the level of your clinical rotation, you will likely start with observation and gradually begin working with patients alongside your CI. At Athletico, the student is not expected to have their own separate caseload. The student will be treating the CIs caseload, and the CI is there to promote learning opportunities.

Key points when getting started:

- Please be mindful of our professional “business casual” dress code, which will be detailed in the Student Packet.
- Athletico does not provide housing.
- There will be different expectations of skill progression and goals based on the level of your clinical rotation.
- Please allow for open communication between you and your CI.
- Create a list of goals detailing specific skills you are interested in learning throughout your rotation.
- Think about specialty programs you would like to learn more about. Discuss with your CI when you arrive at your clinical site how to set up some exposure opportunities.
- You may find it beneficial to bring reference textbooks/notes to assist with application of skills and critical thinking.

We look forward to having you join us for your clinical rotation! Our goal is to provide an exceptional and rewarding educational experience.

Sincerely,

Jen Warning, PT, MPT, CCCE
Manager of Student Clinical Education
