

COVID-19 Workforce Temperature Checks

Protecting the Workforce

In these times, it's more essential than ever to keep your employees safe and healthy and minimize risks that could cause disruption and reduce productivity. Athletico is now conducting onsite workforce temperature screenings to protect your workforce from COVID-19. Our staff will conduct a touch-free temperature scan on all your employees. If an employee's temperature exceeds CDC guidelines, our professionals will inform you and direct the employee to follow isolation guidelines.

Benefits:

-  Non-contact temporal thermometers.
-  COVID-19 screening questionnaire based on CDC guidance.
-  One or more onsite Athletico staff members at each shift change.
